Our creative solution for business communication processing technology that will bring happiness to our bestow clients. Graphics in Administration: Graphics design is widely used in technical schematics, transfer of knowledge, improving the visual presentation of text and various inter office documents. Moreover, it presents intricate pictures in clear and clever way words cannot suffice with its exposure. Advertising Education Entertainment Journalism Web Static Website Design To show case your products and business online, a simple way of designing with a static page. Static websites are search engines friendly and delivers contents or information for which visitors accomplish.

Static pages are made for easy download. It takes less time in downloading images, contents, navigation in comparisons of dynamic site browser compatibility. Static sites have effective graphics with linked pages using font and graphic logo and containing text. It is created with minimum script and HTML. Building a static website is simple because, the technology used for development is simple and sophisticated.

Many business firms use hybrid websites (contains static as well as flash animation). As per your requirements, we will make informative and representing site with animated exposure. In hybrid sites, the top or half part is designed with flash, which represents a unique appearance. Dynamic Website Design Dynamic Websites are made for these purposes like Online databases, membership, private areas, knowledge base, e-business, collaborative content, a resume or jobs database, online shopping site and others. Content changes with change in webpage and maintained through database and programming execution. Dynamic pages allow the users to set preferences regarding the information they want to retrieve.

Dynamic website is capable of engaging the visitors that builds the business dramatically with a great concern. If your need, simple representation then use static websites or if your requirement is collaborative content, e-business, with changing environment or for member only then dynamic websites is your desired needs. It is up to you to judge what you want. Dynamic Website Types: E-Commerce Web Site Community Site Portal Development Web site for Educational Institute Blog Development Online Solution for small business application Real Estate Solution Content Management System Business to Business Online Solution Pages are requested and called from database. Dynamic sites are need, when you need frequent change in website contents and reduce maintenance of site for the users who don't have an idea about HTML. In this, contents with whole components are common to whole site or subsections of site. Components and controls are same as for presentation of user-defined data entered. Dot Techno Lab: Flash Website Design Flash website designing is very important for creating scalable, interacting animation that is used in: Website

navigation controls Long form animation Animated Logos Entire website Flash will provide flexibility to an ideal medium for creativity. Flash websites contains animation, sound and multimedia that leaves a long lasting impression on visitors. It invokes the power of excitement and emotion. Users have been provided more than what they expect from the content. When animation and content are restricted to certain shapes within the text provided then flash is the best universal tool used on the internet. Using excellent animation effects websites based on flash, customization of flash, corporate flash presentation, treated as best for visitor's point of view. Flash can be used in websites as: Introductory Page Animated Logo Design Photo galleries Buttons Menus Animated Marketing Banners Animation with background Music Flash Auto interactive Presentation with Audio If you want to create rich internet content, complex animations with interactive programming and development for unsurpassed introduction to the company. Introduction of flash will create in different fonts and effects with multiple text lines within single flash animation.
